🌐 *A Complete Resource For Where To Purchase Organic Whole Foods Free Of Organophosphates & Other Pesticides and Fertilizers With The Convenience Of An Online Service Delivered Fresh To Your Door.*

To Help You With Your Budgeting Needs, We Have Prepared A Weekly Payment Program To Keep Your Initial Start Up Costs Down. Here Is What You Will Get For Your \$65.00 weekly follow up visits (\$95.00 regularly).

🌐 *Continuity of The hCG Program : Fully supervised monitoring of vital signs and body measurements taken at every office visit for your permanent medical records, and a full review of your dietary logs to reinforce compliance and to answer all of your questions and concerns. We want you to be successful with this Permanent Weight Loss Solution. We are your partners in this therapy. The doctor will be available in person, via phone conferencing or through email to address any additional health concerns that may come up during your therapy and during the Maintenance Phase of your program.*

🌐 *Your B-Complex Lipotropic Injection : This high quality, medical grade formula is valued at \$40.00 per injectable dose, but we are including this in your weekly package at rock bottom price to help you stay on budget for 2010 and STILL get the best quality for your money. Here are more details about what you will be getting:*

The B12 Lipotropic Injection:

Lipotropic compounds are those which help catalyze the break down of fat during metabolism in the body.

🌐 *The lipotropics are a group of three essential amino acids needed for the health of your liver. Your liver removes toxins and metabolizes fat so that it can be removed from the body. The active form of B12 in this formula also contributes to energy and stamina for helping you burn the fat you are mobilizing more efficiently.*

🍷 The vitamin cocktail included in your B12 (Cobalamin) / Lipotropic injection are compounds that maintain a healthy liver and help you to burn the mobilizing fat as an additional source of energy. Without these lipotropics (choline and inositol) fats and bile can become trapped in your liver and this could cause severe problems- like fatty cirrhosis- in your liver over time. Deficiency of lipotropics also block metabolism of fat. By definition, a lipotropic substance decreases the deposits, or speeds up the removal of fats (lipo = fat, tropic = stimulate) within the liver. The key amino acids in this high quality, medical grade product are: Vitamin B12, Choline, Methionine, and Inositol.

🍷 Vitamin B12 is essential for helping to form new, healthy cells in the body. It also boosts energy, which will help you to increase your activity levels.

We Only Use The Highest Quality Ingredients- Providing The Methylcobalamin Form Of Vitamin B12. This Is The Most Potent Active Form Of B12 Found In Your Body. It Is Also Packed With Antioxidant Properties. We Never Compromise And Settle For Lower Quality Cyanocobalamin (A Short Acting Synthetic B12 That Needs To Be Converted To It's Active Form In Your Body & Also Has A Cyanide Particle Component). We Also Do Not Use The Hydroxycobalamin Formula (An Intermediate Acting B12 That Needs Be Converted To The Active Form Within Your Body).

🍷 Choline is a lipotropic fat burner that functions in the body as an agent helping to mobilize fats through the bloodstream. It is essential for fat metabolism & acts as an active fat burner. Choline has been shown to lower blood cholesterol levels, prevent fat from accumulating in the liver, and facilitate in the movement of fat in the cells. It is also important for proper nerve transmission. For instance, choline improves memory by boosting another neurotransmitter, called acetylcholine. Lipotropic agents like Choline (which is a methyl donor needed for liver detoxification) are important because they transport fat to be burned as fuel by the muscles. If you were on a treadmill engaging in heavy aerobic exercise, your body would be burning glucose first, but when that glucose runs low, it switches over to burning fat. When you provide all of these lipotropic nutrients, you can be certain that they will be there to make things happen.

🕒 Methionine is both an antioxidant and a lipotrope, meaning it helps remove fat from the liver. It is the major lipotropic compound in the human body. Methionine is one of the sulfur-containing amino acids (cysteine & cystine are others) controlling the level of beneficial sulfur-containing compounds such as glutathione in the liver. Glutathione and other sulphur-containing peptides (small proteins) play critical roles in defending the body against toxic compounds. All these sulfur-containing compounds are vital for defending against toxic compounds like heavy metals in the liver. Patients with a Sulphur allergy should not take this injection.

When higher levels of toxic compounds are present, more methionine is needed. As we begin to mobilize years of stored fat, many toxic compounds get released making this nutrient critically important for weight loss and fat burning. For example, when estrogen levels are too high in the body, more methionine is needed to metabolize it. Estrogen reduces bile flow through the liver and increases bile cholesterol levels. Methionine acts as a lipotropic agent to prevent excess fat from buildup up in the liver and all over the body. It helps relieve or prevent fatigue and may be useful in some cases of allergies because it reduces your natural histamine release. Histamine is an amino acids that controls dilation of blood vessels and influences brain functions.

🕒 Inositol, a nutrient belonging (unofficially) to the B vitamin complex, is closely associated with choline. It helps export fats from the liver and redistributes it through the body to be used more efficiently as a source of energy. Inositol may even help detoxify the liver. Inositol is also necessary for the proper functioning of your brain, nervous nervous system, and muscles and has been shown to relieve depression and panic attacks.

Remember: For A Limited Time ONLY We Offer This Incredible hCG Weight Loss and Body Resculpting Package With A Small Start Up Fee Of Just \$175,00 Including Labs, Fkg, Orientation & Training, Board Certified Medical Physician Exam & Program Support.

Each Weekly Visit To Follow Is Just \$65.00 And Includes Full Body Measurements, Program & Food Diet Reevaluation, Question & Answer Sessions With The Program Director and Your Lipotropic / B Vitamin Injection~ All This For Just \$65.00 per week. These Visits Are Not Optional.

You'll Need 4 Weekly Follow Ups or 6 Weekly Follow Ups Depending On The Length Of Time Needed According To The Amount Of Weight You Need To Lose. If You Need To Lose 100 Pounds Or More, Then Several Pulsing Therapies Will Be Needed, Each Therapy Will Be Spaced Approximately 6 Weeks Apart.
